EDUCATION

University of Zurich (UZH)

Master of Science in Computer Linguistics & Neuroinformatics
Sep 2022 – Jun 2026

TECHNICAL SKILLS

AI & Data:

- Machine Learning,
- Deep Learning,
- Intelligent Agents,
- Retrieval-Augmented Generation (RAG),
- Optimization Algorithms

IoT & Embedded Systems:

- Micropython, MQTT,
- Embedded AI,
- Sensor Networks,
- Device–Cloud Communication

Software & Platforms:

- Web Development,
- Cloudflare, Oracle, Expo,
- Automation Workflows (N8N)

Engineering Systems:

- HVAC Control Systems,
- PID/DDC Logic,
- Energy Optimization

LANGUAGES

Chinese, Cantonese: Native
English: Fluent
German: Basic knowledge

PROFILE

Engineer with experience in **AI automation, IoT systems, embedded platforms, and data-driven control systems**. Skilled in **software–hardware integration, ML/AI modeling, and experimental neuroscience**. Passionate about developing **scalable intelligent solutions** for real-world applications.

PROFESSIONAL EXPERIENCE

Founder & Developer – SEO Automation Agent System

Self-employed | Mar 2025 – Jan 2026

- Designed and implemented an **AI-based SEO automation system** using intelligent agents
- Automated keyword analysis, content optimization, and performance monitoring
- Integrated real-time analytics for data-driven decision making
- Developed a scalable full-stack solution focusing on automation and system reliability

Founder & Product Developer – AI-Enabled Smart Cat Door & IoT System

Self-employed | Jan 2025 – Jan 2026

- Developed an **AI-powered IoT prototype** for smart pet access control
- Implemented embedded AI features for animal recognition and behavior detection
- Built end-to-end system including firmware, cloud communication, monitoring, and user interface
- Focused on robustness, scalability, and secure device–cloud interaction

Neuroscience Research Intern – In Vivo Neural Recording

HKUST (Guangzhou) | Sep 2023 – Jan 2024

- Performed microsurgery (craniotomy) and neural probe implantation for in vivo recordings.

HVAC System Development Intern

Guangzhou Design Institute | Sep 2020 – Jul 2022

- Optimized HVAC systems, achieving COP ≈ 7.0 and 36% energy savings.
  - Applied ML & IoT solutions for predictive modeling and intelligent building automation.
